Compatibility-list of Android Apps

This book contains list(s) of all sorts of Android Apps and rates their compatibility with SailfishOS AppSupport

An external source with a nicely searchable table can be found here https://sailfishos.app/

- Installing snapchat with AAS on SFOS
- Banking Apps

Installing snapchat with AAS on SFOS

Some users have reported being able to install snapchat.

- Device: Sony Xperia 10 III
- SFOS version: 5.0.0.72
- AAS with microG version: 0.3.11.250932
- using the following older apk
- https://www.apkmirror.com/apk/snap-inc/snapchat/snapchat-11-95-0-39-release/snapchat-11-95-0-39-android-apk-download
- and then logging in
- and finally updating using the aurora store

To discern whether or not this is a good idea is left as an exercise for the reader.

Banking Apps

Banking apps compatibility with SailfishOS

This is a list of banking apps and their compatibility with SailfishOS AppSupport, reported by the community in this thread: https://forum.sailfishos.org/t/banking-apps-on-sailfish-os/

Your banking app is not listed here? You can test it yourself and add an entry here yourself (this wiki is open) or you can report it in the linked thread above. *If you don't own Sailfish yet, you might also want to ask in the mentioned thread if someone can test your app for you.*

There are three categories:

- **Native apps:** These are apps designed for SailfishOS which can be downloaded either in the Official Jolla Store, from Chum ore Openrepos/Storeman. These are the preferred apps to be used on Sailfish.

- **Web apps:** These are apps designed to be used in a web browser. They can be accessed either with any web browser on SailfishOS (e. g. the native "Browser", Angelfish or any Android Browser in AppSupport)
- **Android Apps**: These are apps designed for Android which run under SailfishOS with the Android AppSupport. They can be downloaded from Aurora Store (preferrably) or other sources for Android `.apk`-files.

Native Apps

Web Apps

Android Apps

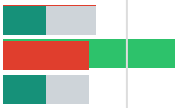

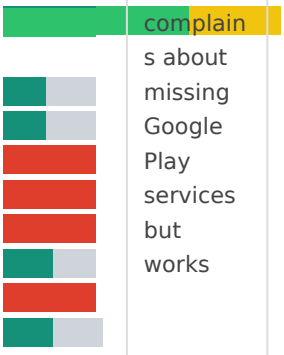

Explanation

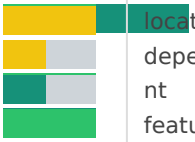

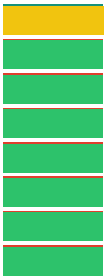

....Android App, works (without additional tweaks)
....Android App, mostly works(without additional tweaks)
....Android App, some things work (without additional tweaks)
....Android App, works with microG
....Android App, mostly works with microG
....Android App, some things work with microG
....Android App, useless (doesn't work)

Compatibility Table
