

# Compatibility-list of Android Apps

This book contains list(s) of all sorts of Android Apps and rates their compatibility with SailfishOS AppSupport

An external source with a nicely searchable table can be found here <https://sailfishos.app/>

- [Installing snapchat with AAS on SFOS](#)
- [Banking Apps](#)

# Installing snapchat with AAS on SFOS

Some users have reported being able to install snapchat.

- Device: Sony Xperia 10 III
- SFOS version: 5.0.0.72
- AAS with microG version: 0.3.11.250932
- using the following older apk
- <https://www.apkmirror.com/apk/snap-inc/snapchat/snapchat-11-95-0-39-release/snapchat-11-95-0-39-android-apk-download>
- and then logging in
- and finally updating using the aurora store

To discern whether or not this is a good idea is left as an exercise for the reader.

# Banking Apps

## Banking apps compatibility with SailfishOS

This is a list of banking apps and their compatibility with SailfishOS AppSupport, reported by the community in this thread: <https://forum.sailfishos.org/t/banking-apps-on-sailfish-os/>

**Your banking app is not listed here?** You can test it yourself and add an entry here yourself (this wiki is open) or you can report it in the linked thread above. *If you don't own Sailfish yet, you might also want to ask in the mentioned thread if someone can test your app for you.*

**There are three categories:**

- **Native apps:** These are apps designed for SailfishOS which can be downloaded either in the Official Jolla Store, from [Chum](#) or [Openrepos/Storeman](#). These are the preferred apps to be used on Sailfish.
- **Web apps:** These are apps designed to be used in a web browser. They can be accessed either with any web browser on SailfishOS (e. g. the native "Browser", Angelfish or any Android Browser in AppSupport)
- **Android Apps:** These are apps designed for Android which run under SailfishOS with the Android AppSupport. They can be downloaded from [Aurora Store](#) (preferably) or other sources for Android `.apk`-files.

## Native Apps

## Web Apps

# Android Apps

## Explanation

-  ....Android App, works (without additional tweaks)
-  ....Android App, mostly works (without additional tweaks)
-  ....Android App, some things work (without additional tweaks)
-  ....Android App, works with microG
-  ....Android App, mostly works with microG
-  ....Android App, some things work with microG
-  ....Android App, useless (doesn't work)

## Compatibility Table
